Summary

I am an analytical and curious thinker who strives to build useful but maintainable web applications. I am pivoting into web development from internal audit, a career which has helped me hone my ability to ask questions about business and technical processes, and identify solutions that will serve user and organizational goals.

Projects

Antarctic News — *Full Stack Developer*

antarcticnews.herokuapp.com

A full stack CRUD app that allows users to add and revise news articles.

- Configured client-side routing of containers with React Router
- Wrote component and API unit tests in Jest to ensure proper rendering and data handling, and incorporated continuous integration with Travis CI

Homonym Helper — *Developer*

github.com/seeksort/homonym-helper-js

A Node.js command line app that checks a file for use of similar sounding words, e.g. “there”, “their”, or “they're”.

- Created object-oriented code for file read/write and app logic
- Developed command line user interface

Bounti — *Contributor and Front End Developer*

github.com/currychern/bounti

Local open source peer-to-peer food sharing React Native mobile app intended to reduce food waste. A group project for ATX Hack for Change 2017 and Open Austin.

- Responsible for application calls to add to and pull data from Firebase API
- Reorganized React Native component and container code for reusability

Experience

Texas Health and Human Services Commission — *Senior Auditor*

Austin, Texas November 2012 - Present

- Mentored staff auditors in interviewing, documentation, and professionalism
- Designed and performed audit testing of: IT application user access controls, data reliability of reports, and contract monitoring activities

Texas Health and Human Services Commission — *Staff Auditor*

Austin, Texas December 2010 - October 2012

- Interviewed clients to understand complex business processes and risks
- Analyzed data to identify areas of inefficiency and potential risk, and provided recommendations to clients to improve Medicaid client outcomes
